

Kuhlmann 0-90°C Insulated IBC Heater

DESCRIPTION

Kuhlmann Electro Heat industrial Intermediate Bulk Container (IBC) Heaters are used in many industries and are perfect for controlling the temperature and viscosity of many materials. IBC heaters are made out of a durable, high quality and lightweight nylon material with adjustable straps making them easy to attach to any standard size drum

BENEFITS

Ideal for heating: Oils, Resin, Honey or Waxes
High efficiency insulation
Safety Thermostat
Made from a durable light weight and flexible nylon material

TECHNICAL DATA

Standard Controller	Digitherm Digital Controller
Outer Material	Nylon
Insulation	8mm Polyester
Power (Voltage)	230V
Plug Type	AS/NZS 3112 (Tested & Tagged)
Waterproof Resistant	IP40 (Optional IP54)

AVAILABLE SIZES

Size	Dimensions	Power	Temperature Range	Number of Controllers
1000L	4400mm x 1000mm	1x 1000W	0 - 40°C	1
1000L	4400mm x 1000mm	2x 1000W	0 - 90°C	2
1000L	4400mm x 1000mm	3x 1000W	0 - 90°C	3

OPTIONAL EXTRAS

IBC Insulation Body Cover

The IBC Insulation Body Cover is a jacket designed to fit over a standard IBC and maintain the temperature inside.

- Made from a nylon material
- Water repellent
- 4 quick release adjustable straps

IBC Deluxe Insulation Cover

The IBC Deluxe Insulation Cover is made from a durable cordura material with a teflon coating making this cover resistant to chemicals and has a high degree of water repellence.

- Integrated lid
- Strategically placed Velcro access pads

IBC Waterproof PVC Cover

The IBC Waterproof PVC Cover is a welded PVC cover that is to be used in conjunction with an IBC Heater. It is made to an oversize specification so that it can simply slide over the top of any IBC Heater underneath.

- Produced from a durable PVC material
- Welded seams for optimal water protection

IBC Top Lid

The IBC Top Lid is designed to be used in conjunction with an IBC Heater or IBC Insulation Body Cover to minimise heat loss. It has strategically placed Velcro pads for opening access.

- Made from a durable cordura material with a teflon coating
- Water repellent and chemical resistant

IBC Insulation Cover

The IBC Insulation Cover is a nylon cover that is designed to insulate from heat loss and speed up the heating process. Strategically placed Velcro access pads for complete side access.

- Integrated lid
- Water repellent

IBC Full Insulation Cover

The IBC Full Insulation Cover is a nylon cover that is designed to insulate from heat loss and speed up the heating process.

- Water repellent
- Fits standard size IBC containers
